PROFESSIONAL SUMMARY

Full Stack Developer (3.99 GPA) proficient in JavaScript (ES6+), MongoDB, React, Express.js, and Node.js. Currently control end-to-end website maintenance and Ubiquity network infrastructure, ensuring system up time. Knowledgeable in building cross-platform applications using React Native and Expo. Pursuing AWS Developer and Generative AI certifications to enhance cloud-native solutions. Awarded AWS Academy graduate badges for Cloud Development and Generative AI Foundations.

SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React, Node.js, Express.js, React Native
- **Databases & Cloud:** MongoDB, MySQL, AWS (S3, EC2, RDS, Elastic Beanstalk), Docker
- **Tools & Technologies:** Git/GitHub, Jira, Socket.IO, Auth0, Stripe, RESTful APIs, JWT
- **Methodologies:** Agile Methodologies

EXPERIENCE

Project Management. April 2024 - July 2026

- Led end-to-end project lifecycle, moving from Figma prototyping to full-stack development using React and Node.js, followed by manual testing and GitHub deployment.
- Applied Agile practices by organizing project goals into 4 one-week sprints totaling 51 points to ensure steady progress and meet strict deadlines.
- Implemented version control using GitHub to track code changes and manage collaborative project updates.

Full Stack Web Development. April 2024 - July 2026

- Built back-end APIs using Node.js, Express.js, and MongoDB to serve data to React front-end applications.
- Debugged front-end components and back-end data routes, reducing application crashes and improving load times.
- Deployed monolithic and decoupled applications to AWS and cloud platforms, improving scalability.

Web Application Development. April 2024 - July 2026

- Designed user and application flows to map out logical data routing from front-end to back-end.
- Integrated React front-end components with Node.js APIs, using third-party libraries to control data states and user interactions.
- Engineered secure user access and session states using Auth0 and database JWT persistence.

Office Manager January 2009 - Present

E-Tech Restoration, Inc.

- Maintained and updated company website to ensure functionality and an up-to-date online presence.
- Administer company's Ubiquity network infrastructure, including a Dream Machine, 4 mesh access points, and a 4-station VoIP phone system.
- Supported daily business operations by managing office administration, HR, accounts payable/receivable, and assisting executive leadership with organizational initiatives.

EDUCATION

Bachelor of Science in Web Design & Development (B.S.) • Full Sail University, Winter Park, FL

July 2026

GPA: 3.99.
